

Solar PV Weather Station

IEC61724 Configurable Solution

Less Complexity. More Reliability.
With a singular vendor to meet your utility-scale PV project specifications, you can focus on what matters

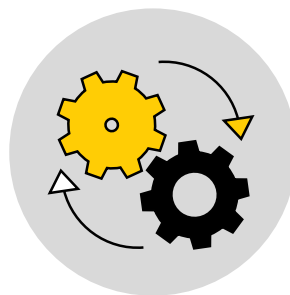

Designed to meet IEC61724:2021 international standards for PV performance monitoring, OTT HydroMet delivers customizable, streamlined, and robust Class A solar weather stations.

Simplified bidding, quoting, and project sourcing

Comprehensive on-site installation and commissioning

Seamless SCADA integration and technical support

Cost-effective and transparent delivery lead time

One Vendor. One Solution.

As a house of brands that includes Kipp & Zonen and Lufft, OTT HydroMet leverages the photovoltaic industry's best-in-class irradiance and weather measurement technology. With service teams and technical experts globally, we are a one-stop-shop for integrated solutions in photovoltaics and meteorology. Discover what we can do for you.
